

# LAB 1

## ERROR HANDLING

# TRY CATCH WITH I/O

1. Create a folder with three csv files
2. Name them "Example1.csv", "Example2.csv", "Example4.csv"
3. Using loop (1:4) read the folder's content without throwing an error

```
for(i in 1:4) {  
    print(paste("Reading file – Example", i, ".csv", sep=""))  
    ....  
}
```
